Graphic Organizers Progress Monitoring

The next pages are a simple way to record and graph your written expression progress monitoring data. Here are the steps.

1. Collect 3 samples of the student's written expression and score them using the following, "Analytic Writing Rubric." Total the points earned for each writing sample (max points = 24). Circle these 3 numbers in the gray "baseline" section (one per column) of the "Progress Monitoring: Frequency" chart.
2. Begin intervention.
3. One time weekly (or biweekly) score the student's writing using the "Analytic Writing Rubric" and total the points earned. Circle the total points earned in the white "intervention" section of the "Progress Monitoring: Frequency" chart.

Tips:

Date each data point in the first row of the chart.

Only one chart per 6-8 week intervention cycle will be used, while multiple analytic writing rubrics will be needed.
